

We are looking for you!

We are looking for a highly motivated and target-oriented person for our European Master Data team. This position is located in Egelsbach, close to Frankfurt am Main. You have the ability to work independently as well as a trustworthy member of European and cross-functional teams? You like to coordinate, manage and enhance material master data processes? If so, please apply for the position as

SAP Master Data Analyst / Coordinator (m/w)

We, the SETON-Division of Brady GmbH, are an expanding company and offer you the opportunity to contribute and make a difference. As one of the market leaders in the field of industrial identification solutions we value the changes in our business environment as a chance to develop our company. Various DAX-listed companies trust in our products and our services.

The goal of this position is to create value for the organization by implementing common material master data processes. Providing the business with procedures and guidelines for the creation of master data as well as setting up and maintaining fixed data in specific systems (SAP, STEP, Magento) to ensure accurate transactional and marketing data on all output levels for all sub-processes within the Brady organization is your main field of work.

Your responsibilities:

- You control and manage SAP material master data on a day to day basis to ensure that business objectives are met
- You actively manage New Product Introduction and pricing processes in SAP, ensuring data is driven from system to system with accuracy and efficiency
- You work as a key problem solver of the SAP system, identifying and solving issues and concerns efficiently, whilst looking for root cause analysis and developing solutions for remedy, using query (SQVI) and analysis tools
- You contribute to the development of existing systems and processes
- You test new systems and processes, including providing support as needed to define and document "SAP Business Blueprints"
- You create, develop and maintain Best Practices for global marketing master data structures as well as auditing and quality checking data standards before SAP load
- You provide master data support across departments (customer service, purchasing, operations, product management) through cross-functional training
- You act as a support for the Marketing Master Data team when required

Your background:

- You gained 3 to 5 years work experience
- You possess experience in working with SAP
- You have the ability to extract and analyze data from different sources
- Your English is fluent
- You developed competency in problem solving and decision making
- You show a high level of initiative, the ability to learn "on the fly", an action-oriented way of working and the ability to set priorities
- You are focused on improvement with constantly view on products, processes and services
- You bring a comprehensive knowledge of MS Office (Excel, Access, Word and PowerPoint)

Our benefits:

- We are a growth-oriented international company with appealing conditions
- We maintain an open and honest working atmosphere and attach great importance to a good team atmosphere
- We offer you an interesting field of activity, perspective and freedom for self-responsible action
- An attractive compensation with capital forming benefits is one of our standards, just like an extensive induction phase

If we have aroused your curiosity and interest, we are looking forward to getting to know you!

Please apply with your **complete application in English including your salary expectations and your earliest start date** by sending it to:
